PPG

Patient Participation Group

Thursday 21 March 2019

11.00 am - 12.00 midday

Our PPG meetings are changing. We have decided to change the dynamic of the group to make it less formal and more inviting to all of our patients.

No agenda, No minutes

Just an informal discussion and a chance to share mutual experiences.

Our aim is to share information with our patients and give patients a chance to input their ideas and suggestions on how the practice can improve. We also want to celebrate what we do best.

Each year we will also continue to offer an information session on various topics.

We do not expect patients to commit to every meeting and no appointment is necessary.

Come and join us for a coffee and a chat!

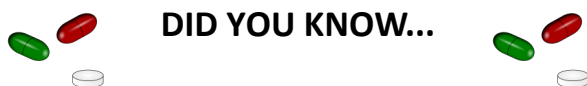

Access to our online service is up and running again after its update.

You can book appointments, order repeat prescriptions and view your medical record online.

You need to register to use this service and apply separately to view your record online.

Application and registration forms are available on reception.

Once again we apologise for the inconvenience this caused.

DID YOU KNOW...

The average price of paracetamol on prescription is £34.00 for 32 tablets. At a supermarket you can purchase 16 paracetamol tablets for between 19 and 25 pence.

Medication bought over the counter for fungal infections, diarrhoea, constipation, basic pain relief and anti-inflammatories (e.g. Ibuprofen) can save the NHS millions of pounds each year.
