What is an NHS Health Check?

The NHS Health Check is a health check-up for adults in England aged 40-74. It's designed to spot early signs of stroke, kidney disease, heart disease, type 2 diabetes or dementia.

As we get older, we have a higher risk of developing one of these conditions. An NHS Health Check helps find ways to lower this risk.

How do I get an NHS Health Check?

If you're in the 40-74 age group without a pre-existing condition, you can expect to receive a letter from your GP or local authority inviting you for a free NHS Health Check every five years.

How can I improve my test results?

Once you've had your NHS Health Check, your healthcare professional will discuss your results with you. You'll be given advice to help you lower your risk of a stroke, kidney disease, heart disease, diabetes or dementia, and maintain or improve your health. But you don't have to wait until then to make healthy changes.
